## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wu US 5,878,878 in view of Lohrman et al. US 5,115,930.

Wu '878 teaches a container comprising a hinged inner casing, and covers (25) and (36) which are attached on the outside of the inner casing by through hole (11). The container is taught to be used for housing cosmetics, but fails to teach an engaging body.

Lohrman '930, in the embodiment of figure 8 teaches it is known to provide covers on closures by snap connection means by engagement of cover with a closure engaging body and an engageable body. Although disclosed on a circular and threaded closure, one of ordinary skill would be motivated to provide the type of connection disclosed in Lohrman '930 on the cover of Wu '878 so as to provide a secure resilient snap connection.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the cover of Wu '878, providing the engaging body and engageable body as taught by Lohrman '930, motivated by the benefit of providing a secure, resilient snap connection to hold the two elements together.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the

Art Unit: 3727

conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 1-2 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 5-6 of copending Application No. 10/670,770. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim substantially the same invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claim 1-2 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of copending Application No. 10/687,978. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim substantially the same invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
